Education

Indiana University Bloomington - Luddy School of Informatics, Computing, and Engineering **May 2027**
Bachelor of Science in Computer Science (Computer Systems Specialization)
Minors: Mathematics, Data Science, Atmospheric Science
GPA: 3.63/4.00
Coursework: Functional Programming, Object-Oriented Programming, Web Development, Data Structures and Algorithms, Database Concepts (with PostgreSQL), Artificial Intelligence and Machine Learning, Computer Systems, Computer Networking, Linear Algebra, Calculus I & II, Introductory Physics

Work Experience

Undergraduate Researcher **May 2026 - Present**
University at Albany — Albany, NY
- Investigated indoor air quality (IAQ) characteristics across different indoor environments, deploying IAQ sensor monitoring and spatial modeling techniques to compare pollutant behavior and inform air quality management strategies.
- Utilized Rhino 8 and Grasshopper for spatial modeling and Python for data cleaning and analysis, culminating in a conference paper documenting findings on indoor environmental characteristics.

Undergraduate Instructor and Grader **January 2025 - Present**
Indiana University — Bloomington, IN
- Graded coursework and provided targeted feedback for 60 students across two sections in introductory business mathematics, ensuring timely grade delivery and supporting student mathematical development.
- Co-instructed a 251-student probability and business calculus course alongside two peer educators.
- Facilitated office hours up to 4 hours per week to mentor students and clarify mathematical concepts.

Undergraduate Mentor **August 2024 - November 2024**
Indiana University — Bloomington, IN
- Collaborated with undergraduate instructors to facilitate learning for 30 students in informatics fundamentals, delivering engaging lessons on programming, data visualization, and web development technologies.
- Guided 40 students in designing and implementing two technical projects using HTML, CSS, Python, Excel, and Google Data Studio, fostering hands-on skill development and project-based learning outcomes.

Translator and Publishing Assistant **October 2014 - September 2015**
Illustext Publishing — Seoul, Republic of Korea
- Translated and assisted in publishing The Creature from My Closet novel series by Obert Skye from English to Korean, adapting content for Korean audiences while preserving narrative integrity.
- Collaborated with the author and editorial team throughout the publication process, ensuring translations maintained the original tone, style.

Projects

Engagement Tracking System for Luddy Events
Boost Luddy Case Competition — Indiana University
- Developed a digital engagement tracking solution using Jotform, replacing paper-based attendance systems and enabling real-time participant feedback collection at university events.
- Collaborated with a team of 5 to design and implement a QR code-based survey system with time-restricted access, presenting the complete solution to the Associate Director of Luddy LLC and competing against other teams.

Weather Forecast API Client
- Developed a Java application that retrieves and parses real-time weather data using HTTP GET requests to the Open-Meteo API, displaying 7-day forecasts with 3-hour intervals for user-specified locations.
- Implemented JSON data parsing using Google's Gson library and Maven dependency management, extracting temperature and time arrays from API responses and formatting output for user readability.

Custom Browser Startpage
- Designed and developed a customizable browser startpage template using HTML, CSS, and JavaScript with personalized navigation links, and modular design for easy user customization.

Technical Skills

Programming: C, Python, Java, R, Scheme, Data Structures and Algorithms
Technical Tools: Git, PostgreSQL, LaTeX, Markdown, Vim/Neovim, HTML/CSS, Javascript, 3D Modeling using Rhino 8 and Grasshopper
Design & Platforms: Excel, Video Editing, Digital Art, Windows, MacOS, Linux, Obsidian
